PROJECT

Major Canadian Airport, Expanding Their Terminal

CUSTOMER

Large Electrical Distributor in Canada

PRODUCT

25KV 4/0-1C HV TECK

Southwire *SPEED™* Services

A large electrical distributor in Canada was looking for 2400 meters of 25KV 4/0-1C HV TECK cable with pre-installed pulling heads for a major airport expansion project.

Our Southwire *SPEED™* Services team was able to coordinate with manufacturing to produce a custom length solution to the exact specifications and with shipping to ensure that the needed quantity could be shipped, with labor saving pulling heads. All this customization and concierge service supported a reduced lead time in-order-to meet the distributor's tight deadlines.
