

METAL CLAD CABLE in a SIMpull BARREL™ CABLE DRUM

WE LISTENED:

Reels are heavy and difficult to handle on the jobsite. This limits productivity, consumes valuable floor space and storage, and increases safety concerns.

SOLUTION:

MC Cable in a SIMpull BARREL™ Cable Drum requires a fraction of the set-up time and effort compared to a wire cart and reels. Using barrels reduces physical effort required to pull wire, increasing safety and productivity. The SIMpull BARREL™ Cable Drums are available in a variety of MC constructions.

FEATURES //

- Available in #14, 12, and 10 (up to 4 conductors for the largest size)
- Available in Aluminum and Steel Armor
- Available in MC^{AP}® Metal Clad All Purpose Cable, HCF MC^{AP}® Metal Clad All Purpose Cable, MC-PCS Duo™ Cable, and HCF MC-PCS Duo™ Cable
- Available in Custom Color configurations
- Available in Solid and Stranded constructions

BENEFITS //

- Convenient cable drum package holds longer lengths
- Overall system increases productivity for branch circuit installations
- Less material handling and reduced wire remnants
- Designed to help reduce potential lifting/handling/pulling injuries
- No broken reels, flanges, or arbor holes

ACCESSORIES

SIMpull BARREL™ Hand Truck SBT01

SIMpull BARREL™ Tripod SBT02
