MAXIS® HYDRAULIC BENDING MACHINE

Q: Does the Southwire™ Hydraulic Bender work with competitors shoes and sleds?

A: *The Maxis® Hydraulic Bending machine is made to work with competitive shoes, sleds, and collars.*

Q: Does this bending machine work with different hydraulic pumps and hoses?

A: *The Maxis® Hydraulic Bending Machine is purpose built and uses a purpose built pump, unfortunately it will not work with competitive units.*

Q: What is the service interval for the Maxis® Hydraulic Bending Machine?

A: *The Hydraulic System should be serviced annually, inspections for leaks should occur before each use.*

Q: Where can I find Setup instructions for the Maxis Hydraulic Bending Machine?

A: *On the unit itself there is a QR code containing various pieces of instructions on how to setup and use this piece of equipment.*

Q: Are replacement parts available for the Maxis Hydraulic Bending Machine?

A: *While we do not anticipate the need for replacement of parts on this piece of equipment, all parts are made available and stocked in Georgia or Arizona.*

Q: How do I secure my Maxis® Hydraulic Bending Machine for transport?

A: *The Maxis® Hydraulic Bending Machine has four tie down points, one on each corner of the tool, which can be used to secure the tool to your truck or trailer. The mast should be lowered during transport. The pipe is cut level, and the rollers are on level ground.*
